Key methamphetamine ingredient to be Rx

Mississippi legislators are attempting to tighten restrictions on the way cold medicine is able to be purchased. Currently it is available over the counter but the recently approved bill would require products containing the methamphetamine ingredient pseudoephedrine to be purchased with a prescription only.

Just one other state in the Nation, Oregon, currently carries this law on pseudoephedrine however many states have already implemented tracking systems and require photo identification to purchase the drug.

There are concerns that the added cost of a doctor visit to acquire the common cold medicine will make it unaffordable for some families.

New to our drug database

This month we've had several requests for new drug additions, including:

- Pramipexole .125mg (63 tabs)
- Pramipexole .25mg (90 tabs)
